

Nisshin City Disaster Preparedness Map

Set up of Evacuation Sites

Evacuation sites will be set up for people whose houses were destroyed by an earthquake or other natural disaster and cannot live at home or are at risk as a result of such a disaster.

It is important to find out which evacuation site is closest to your home. You should also mark the route on the map and make a trial run to the site.

You can use any evacuation site, regardless of your school district or administrative district. Please do not drive to the site.

Key		
1	Open Evacuation Areas	
2	Emergency Evacuation Centers	Temporary gathering sites
3	Evacuation shelters (for temporary stays)	Evacuation centers (for use until the evacuation shelters open)
4	Evacuation shelters (for temporary stays)	Main shelter
5	Disaster management organization	Secondary shelter
6	Disaster siren	
7	Earthquake-resistant water tank	
8	Emergency transport road	
9	Reservoir-River	
10	Bridge	
11	District borders	

Designation of areas with high risk of landslide occurrence

Landslide Risk in Steeply Sloping Area

Houses located near or next to steeply sloping ground with an inclination of 30 degrees or more and height of 5 meters or higher are at risk of damage from a landslide.

Landslide Risk Area

This area is not safe for residents, due to the high risk of loss of life or severe bodily injury in the event of landslide.

Special Precautions against Landslide Risk Area

This area has an increased risk of landslide occurrence that may cause damage to buildings, loss of life or severe bodily injury to residents.

Why not discuss what to do in case of an emergency and fill in your family rule

☐ Evacuation Sites / Evacuation Shelters

☐ Evacuation routes (Attention)

☐ Notes (How to meet your children)
